### PROFESSIONAL EXPERIENCE

PARALLELScore — California,USA [parallelscore.com](https://parallelscore.com)

#### Technical Product Manager.

At Parallelscore,I lead a team of 10+ team development, engineering, product design and marketing professionals in all phases providing solutions. (from requirement gathering through design ,architecture , build ,test phases , QA, launch and support

- Managed the concept-to-launch of a commercially used teleradiology product which serves as a platform that provides easy access for diagnosing radiological related issues. This platform enables real-time diagnosis to doctors and has been generating funds since its launch early this year.
- Performed all the agile required tasks, tracking product metrics , execution and testing.
- Prioritizing Product features and capabilities.
- Developed a deep understanding of the business objectives of internal and external stakeholders; evangelized the product vision and built trust by maintaining an accurate and achievable roadmap.

PRODUCT MANAGER ,SMARTCHANGE — Cryptosmart,Lagos Nigeria. <https://www.cryptosmartnow.io/>

Cryptosmart.io is a blockchain project that deals in providing various services leveraging on the algorand ecosystem to bring her vision such as asset management into the space. One major product that is been is used by cryptosmart is the Smartchange which was the product that I personally managed from the Ideation stage of the product to its launch date of this product.

---

BRAINDAO — JAMAICA <https://everipedia.org/>

#### **Technical Product Manager.**

Braindao uses blockchain technology to help us fulfill our vision for a world where all knowledge is available to all people - a world in which everyone, everywhere can participate in sharing what they know and providing value to others.

My function include :

- To review the code of the developers on a daily basis and give comments for approval for merge.
- To plan for weekly meetings with clients and Stakeholders.
- Track and monitor the progress of developers using the Github issues tracking tools.
- Plan and prepare a status report for stakeholders and also prepare a weekly report.
- Plan and prepare a customer journey plan.
- Have meetings with the product owner on the next features to be built.
- Organization of the backlog in order of priority.
- Organize meetings with the developer and designer to discuss the architectural plan of the product.
- lead retrospective session during sprint planning.

#### **Device Testing**

- Planned functional testing for new Amdocs billing processing initiative and down line reporting processes, coordinated reporting of all new and old billing system applications.
- Worked with a co-worker to ensure a device could be provisioned, create usage and be billed thru the new Amdocs billing system.
- Executed many product device testing, gaining knowledge on which products had test systems and which could only be done in production.

---
